Science: Each student has to prepare an experiment for our Science Fair. This experiment should include a three pages written report (descriptive essay) about your experience while preparing your experiment.

Solve **All** chapter 14 and 15 section reviews.

Copy All the elements in the periodic table providing the following information:

Classify them into metals and non-metals.

Element's name, symbol, atomic number

Study the list for the first quiz we will have.

Study the list of polyatomic ions.

Look for images of the three Newton's laws of motion.

Build a simple and a compound machine

Important: all this assignments will be a 70% of your grade, we will have an exam of 30%, you can get extra points for your effort and dedication.

Math:

Completing the square.

Do 10 exercises from written, after you should read the next topic, the discriminant.

SEGUIREMOS ACTUALIZANDO CON LAS OTRAS ASIGNATURAS.

Literature:

Write a three pages essay of your life, include: past present future plans etc.
